

Andrews Lodge is one of Prince Edward Island's largest community care facilities with locations in Summerside, Charlottetown and Stratford. The company selected MacLean Construction to establish their most recent and most luxurious accommodations to date called Andrews of Stratford. The high-quality construction of this facility is complemented by a close attention to detail found in this building's many features, including the custom millwork which was supplied by Storemark. Andrews of Stratford opened in June 2005 and was completed on schedule and on budget.
